</tbody>
</table>

Chin State ranks amongst the lowest three in population size compared with other States and Regions in the country.

**Population density**

Chin State is the least densely populated State/Region in the country with 13.3 persons per Km². The Union level density is 76.1 persons per Km².

**Population composition**

48% of the population are male and 52% are female.

The “broad base” of the pyramid indicates that there are more children and young people in the population which is different to the “pot shape” of most other State/Region pyramids which indicate a declining fertility rate.

**Proportion of broad age groups in the total population**

The population can be divided into three broad age groups, those less than 15 years (Child population), 15-64 years (Productive age), and 65 years and over (Aged population).

- Under 15 years
- 15-64 years
- 65 years and over

**Dependency Ratio**

In Chin State the Total Dependency Ratio was 81 in 2014. The dependency ratio measures the pressure on the productive population which is considerable in Chin State. The Total Dependency Ratio is much higher than at the Union Level which was 52.5 in 2014.

**Housing conditions**

88.6% of households in Chin State own their house.

**Literacy**

Out of 279,247 people aged fifteen years and over, 221,858 reported that they were able to read and write. The literacy rate for Chin State is 79.4%, lower than the Union literacy rate of 89.5%. Literacy rates are higher for males (88.5%) than females (71.9%).

**School attendance**

Out of a population of 403,422 persons aged 5 years and over living in conventional households, 132,097 are currently attending school.

**Labour force participation rate**

64.8% of all people who are of working age (15-64) were in the labour force. The proportion of males in the labour force is higher (77.6%) than females (53.8%).
