Introduction

In April 2014, the Government of the Republic of the Union of Myanmar conducted its latest census, after three decades without a Population and Housing Census. In the post-independence period, comprehensive population and housing censuses were only successfully undertaken in 1973, 1983 and most recently in April 2014.

Censuses are an important source of benchmark information on the characteristics of the population and households in every country. One unique feature of a census is its ability to provide information down to the lowest administrative level. Such information is vital for planning and evidence based decision-making at every level. Additional data uses include allocation of national resources; the review of administrative boundaries; the positioning of social infrastructures, drawing national development plans, service provision and developing social infrastructure, and for humanitarian preparedness and response.

The results of the 2014 Census have been published so far in a number of volumes. The first was the Provisional Results released in August 2014. The Census Main Results were launched in May 2015. These included The Union Report, Highlights of the Main Results, and reports of each of the 15 States and Regions. The reports on Occupation and Industry and Religion were launched in March 2016 and July 2016, respectively. All the publications are available online at <http://www.dop.gov.mm/> and <http://countryoffice.unfpa.org/myanmar/?publications>.

The current set of the 2014 Census publications comprise township and sub-township reports. Their preparation involved collaborative efforts of the Department of Population and UNFPA. This report contains selected demographic and socio-economic characteristics of Yathedaung Township in Rakhine State. The information included in this report is the situation of 2014 March 29, Census night. The information presented in this report is based on the population and households that were enumerated during the census.

Township level information is very important. However, the level of confidence of township estimates is not the same as Union level information. Some of the townships have relatively small populations; the interpretation of these estimates should be made with caution. Some of the indicators, such as IMR/U5MR, were adopted only after careful analysis considering a number of factors to ensure consistency in the results. Estimates for townships with relatively small number of observations should not be taken as exact estimates of the mortality level, but rather they should be regarded as reasonable indicators for the scale of mortality risk they experience, an indication of which townships are better off and which are in a more vulnerable situation.

Census information on Yathedaung Township

(A) Demographic Characteristics

Total population	Enumerated Population	111,974 *		
	Estimated Population	50,911		
Males	50,026			
Females	61,948			
Sex ratio	81 males per 100 females			
Percentage of urban population	6.7%			
Area (Km ²)	1,133.8 **			
Population density (persons per Km ²)	143.7 persons			
Number of wards	4			
Number of village tracts	86			
Population in conventional households	Total	Urban	Rural	
	109,989	7,160	102,829	
	24,341	1,510	22,831	
Number of conventional households				
Mean household size	4.5 persons ***			
<ul style="list-style-type: none"> • In Yathedaung Township, there are more females than males with 81 males per 100 females. • The majority of the people in the Township live in rural areas with only (6.7%) living in urban areas. • The population density of Yathedaung Township is 144 persons per square kilometre. • There are 4.5 persons living in each household in Yathedaung Township. This is slightly higher than the Union average. 				

Note: * Includes both household population and institution population.

** Settlement and Land Record Department, Ministry of Agriculture, Livestock and Irrigation, (2014-2015)

*** Calculated based on conventional household population

80 - 84	1,009	358	651
85 - 89	469	162	307
90 +	179	53	126

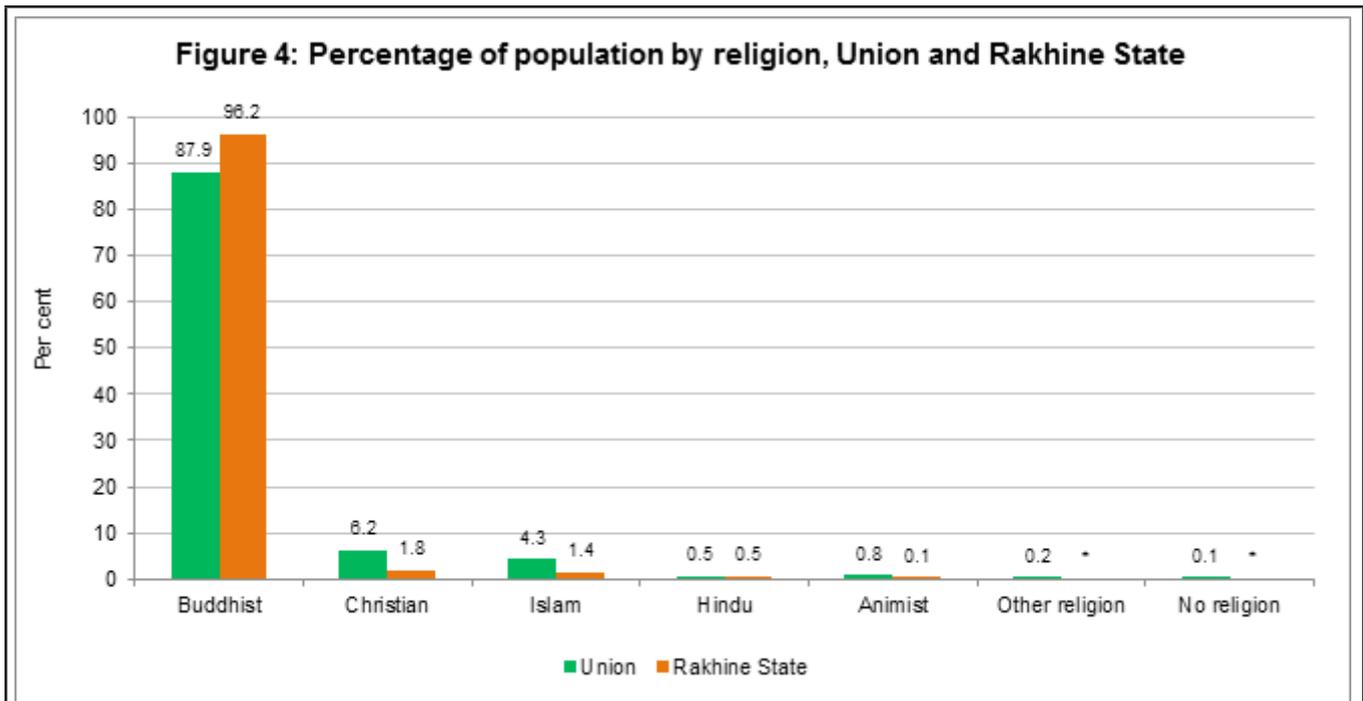

- The proportion of productive working population between 15 to 64 years of age in Yathedaung Township is 58.7 per cent.
- The proportion of children aged 14 and below together with the proportion of the elderly aged 65 and over are less than the proportion of the working age group population.
- Fewer proportions of children and elderly reduce the dependency of those age groups on the working age population.

Figure 3: Population pyramid (Union, Rakhine State, Sittway District and Yathedaung Township)

- The birth rate has been noticeably declined in Yathedaung Township since the last 10 years.
- The population has markedly declined from age group 15-19 onwards.
- Compared to Union level, there is a lower percentage of working age group 15-64 population in Yathedaung Township.
- Starting from age group 15-19, there are less males than females in all age groups.

(B) Religion

- At the Union level, the composition of the population by religion is: 87.9% Buddhist, 6.2% Christian, 4.3% Islam, 0.5% Hindu, 0.8% Animist, 0.2% Other religion and 0.1% No religion.
- In Rakhine State, it is 96.2% Buddhist, 1.8% Christian, 1.4% Islam, 0.5% Hindu, 0.1% Animist, less than 0.1% for Other religion and No religion.

Note: * Less than 0.1 per cent.

(C) Education

Figure 5: School attendance by age, Union, Rakhine State and Yathedaung Township

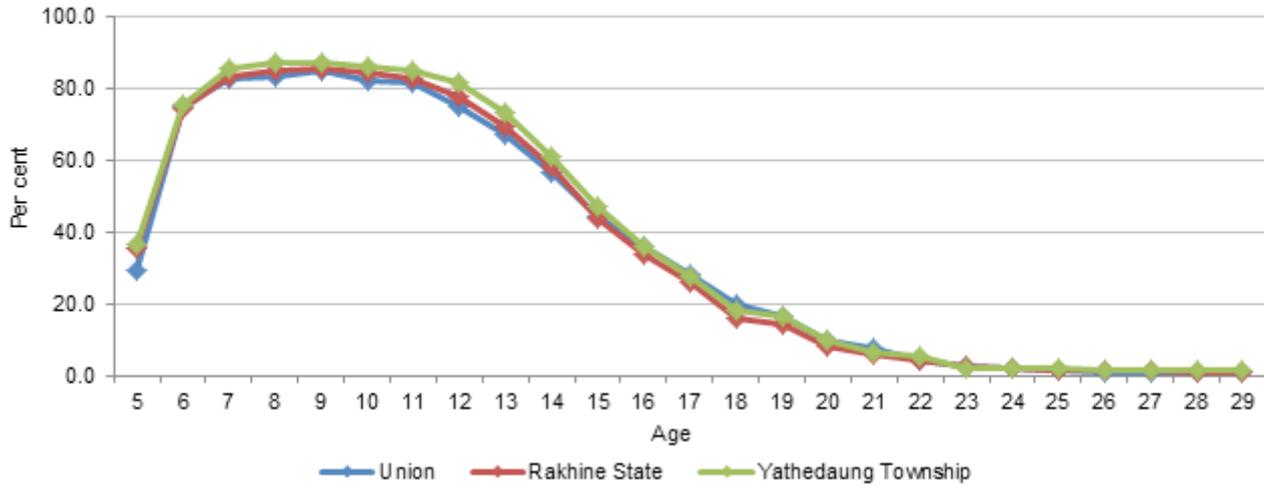

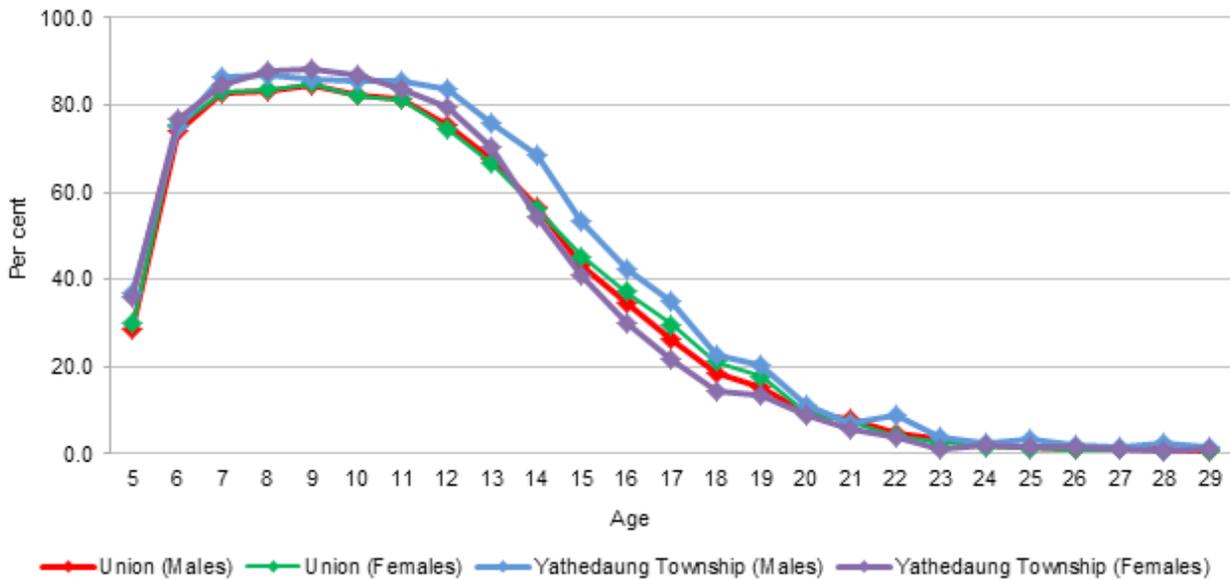

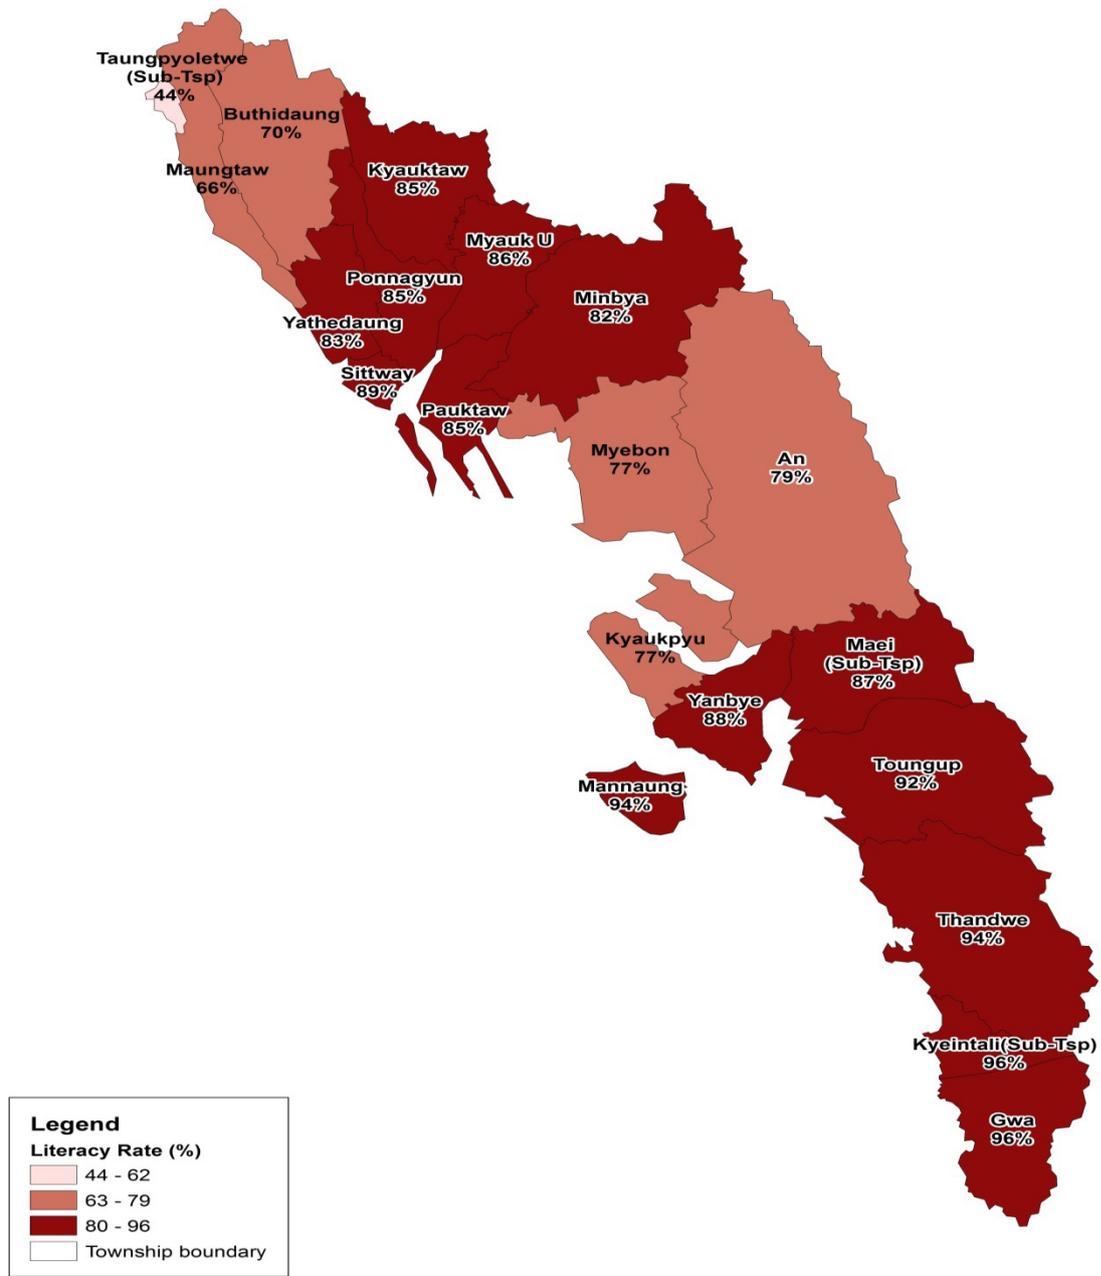

Figure 6: School attendance by age by sex, Union and Yathedaung Township

- School attendance in Yathedaung Township drops after age 12 for both males and females.
- Compared to the Union, the school attendance of males and females in Yathedaung Township is high since the age of school attendance.

Figure 7: Literacy rate, Rakhine State (aged 15 and over)

Union	: 89.5%
Rakhine State	: 84.7%
Sittway District	: 85.8%
Yathedaung Township	: 83.4%

Table 4: Youth literacy rate (15 - 24), Yathedaung Township

Sex	Total Population (15 - 24)	Literacy Rate (15 - 24)
Total	18,468	91.1
Males	7,663	94.1
Females	10,805	89.0

- The literacy rate of those aged 15 and over in Yathedaung Township is 83.4 per cent. It is lower than the literacy rate of (84.7%) for Rakhine State and (89.5%) for the Union. Female literacy rate is 76.9 per cent and for the males it is 93.0 per cent.
- In Yathedaung Township, the literacy rate for youth aged 15-24 is 91.1 per cent with 89.0 per cent for females and 94.1 per cent for males.

Table 5: Population aged 25 and over by highest level of education completed, urban/rural and sex

	Total	None	% Never attended	Primary school		Middle school (grade 6 - 9)	High school (grade 10 - 11)	Diploma	University/ College	Post-graduate and above	Vocational training	Other
				(grade 1 - 4)	(grade 5)

Source of lighting		Total	Urban	Rural
Electricity		9.1	53.4	6.1
Kerosene		20.2	1.0	21.4
Candle		55.9	33.3	57.4
Battery		7.7	2.8	8.0
Generator (private)		2.7	8.2	2.3
Water mill (private)		*	0.3	*
Solar system/energy		4.2	0.9	4.5
Other		0.1	-	0.1
Total	Per cent	100.0	100.0	100.0
	Number	24,341	1,510	22,831

- In Yathedaung Township, 9.1 per cent of the households use electricity for lighting. Compared to other townships in Rakhine State, it is lower. The percentage of households that use electricity in Rakhine State is 12.8 per cent.
- The use of candle for lighting is the highest in the township with 55.9 per cent.
- In rural areas, 57.4 per cent of the households use candle for lighting.

Note: * Less than 0.1 per cent.

Type of cooking fuel

Figure 17: Proportion of households using wood-related cooking fuel

Union	: 81.0%
Rakhine State	: 96.6%
Sittway District	: 95.6%
Yathedaung Township	: 95.3%

Table 16: Conventional households by type of cooking fuel by urban/rural

Type of cooking fuel		Total	Urban	Rural
Electricity		0.2	0.8	0.2
LPG		*	-	*
Kerosene		1.8	0.1	1.9
BioGas		*	-	*
Firewood		91.6	63.3	93.5
Charcoal		3.7	29.9	1.9
Coal		0.4	3.9	0.1
Other		2.3	1.9	2.3
Total	Per cent	100.0	100.0	100.0
	Number	24,341	1,510	22,831

- In Yathedaung Township, households mainly use wood-related fuels for cooking with 91.6 per cent using firewood and 3.7 per cent using charcoal.
- About 0.2 per cent of households use electricity for cooking.
- About 93.5 per cent of households in rural areas use firewood and 1.9 per cent use charcoal.

Note: * Less than 0.1 per cent.

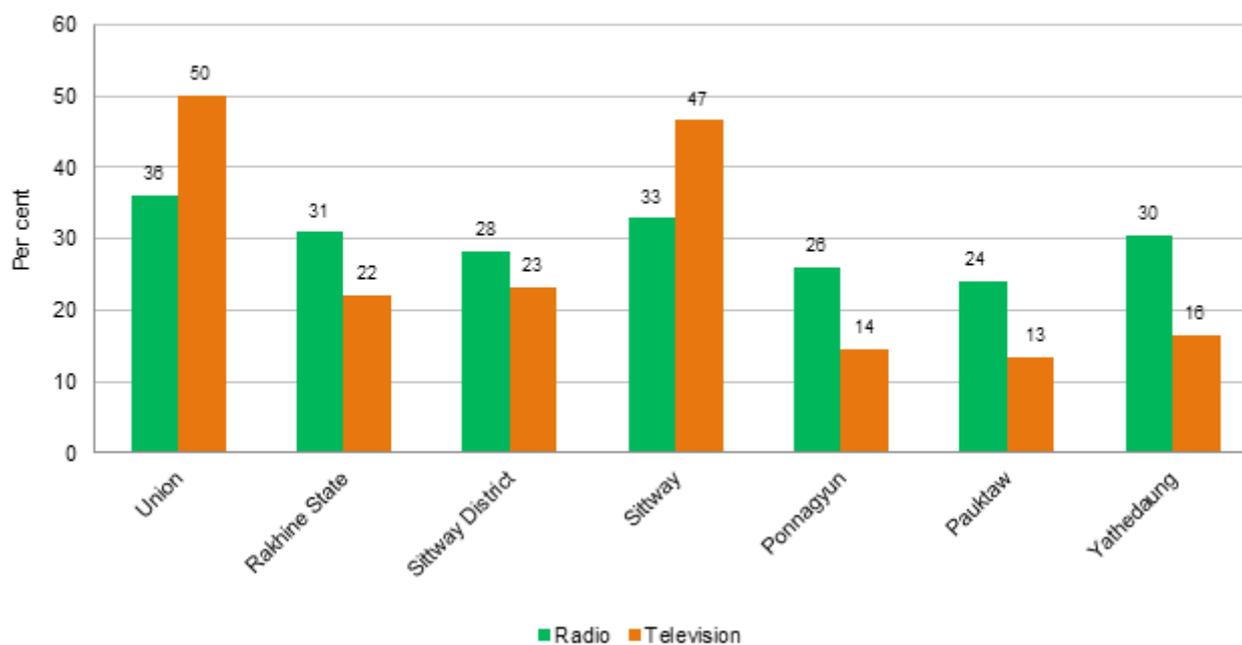

Communication and related amenities

Table 17: Conventional households by availability of communication and related amenities by urban/rural

Residence	Conventional households	Radio	Television	Land line phone	Mobile phone	Computer	Internet at home	% with none of the items	% with all of the items
Total	24,341	30.4	16.4	4.1	15.1	0.9	1.1	59.6	0.2
Urban	1,510	37.1	48.0	1.0	57.6	5.5	10.8	31.5	0.2
Rural	22,831	30.0	14.3	4.3	12.3	0.6	0.5	61.5	0.2

- About 30.4 per cent of the households in Yathedaung Township have access to radio and is the highest among the access of communication and related amenities. About 57.6 per cent and 30.0 per cent of households in urban areas and rural areas have access to mobile phone and radio respectively and are highest in these areas.

Figure 18: Percentage of households with access to radio and television

- About 16.4 per cent of the households in Yathedaung Township have access to television and about one in three households (30.4%) reported having a radio.

Figure 19: Proportion of households with access to mobile phone

Union	: 32.9%
Rakhine State	: 15.8%
Sittway District	: 19.2%
Yathedaung Township	: 15.1%

- About 15.1 per cent of the households in Yathedaung Township reported having mobile phones. Compared to other townships in Rakhine State, Yathedaung is in the lowest group proportion.

Transportation items

Table 18: Conventional households by availability of transportation items by urban/rural

State/District/Township	Conventional households	Car/Truck/ Van	Motorcycle/ Moped	Bicycle	4-Wheel tractor	Canoe/ Boat	Motor boat	Cart (bullock)
Rakhine State	459,772	2,415	54,507	68,373	2,825	17,180	25,083	74,563
Urban	72,624	1,338	22,383	30,430	821	1,040	1,465	2,561
Rural	387,148	1,077	32,124	37,943	2,004	16,140	23,618	72,002
Sittway District	109,256	605	10,088	14,324	395	4,611	4,195	12,334
Urban	25,352	511	7,677	10,886	178	270	304	451
Rural	83,904	94	2,411	3,438	217	4,341	3,891	11,883
Yathedaung Township	24,341	24	815	1,315	84	1,153	696	4,231
Urban	1,510	2	214	405	7	20	61	89
Rural	22,831	22	601	910	77	1,133	635	4,142

- In Yathedaung Township, 17.4 per cent of the households have cart (bullock) as a means of transport and it is the highest proportion, followed by 5.4 per cent of households having bicycle.
- Analysis by urban/rural residence, the majority of the households in urban areas mainly use bicycle and rural areas use cart (bullock) as a means of transport.

(H) Fertility and Mortality

Fertility

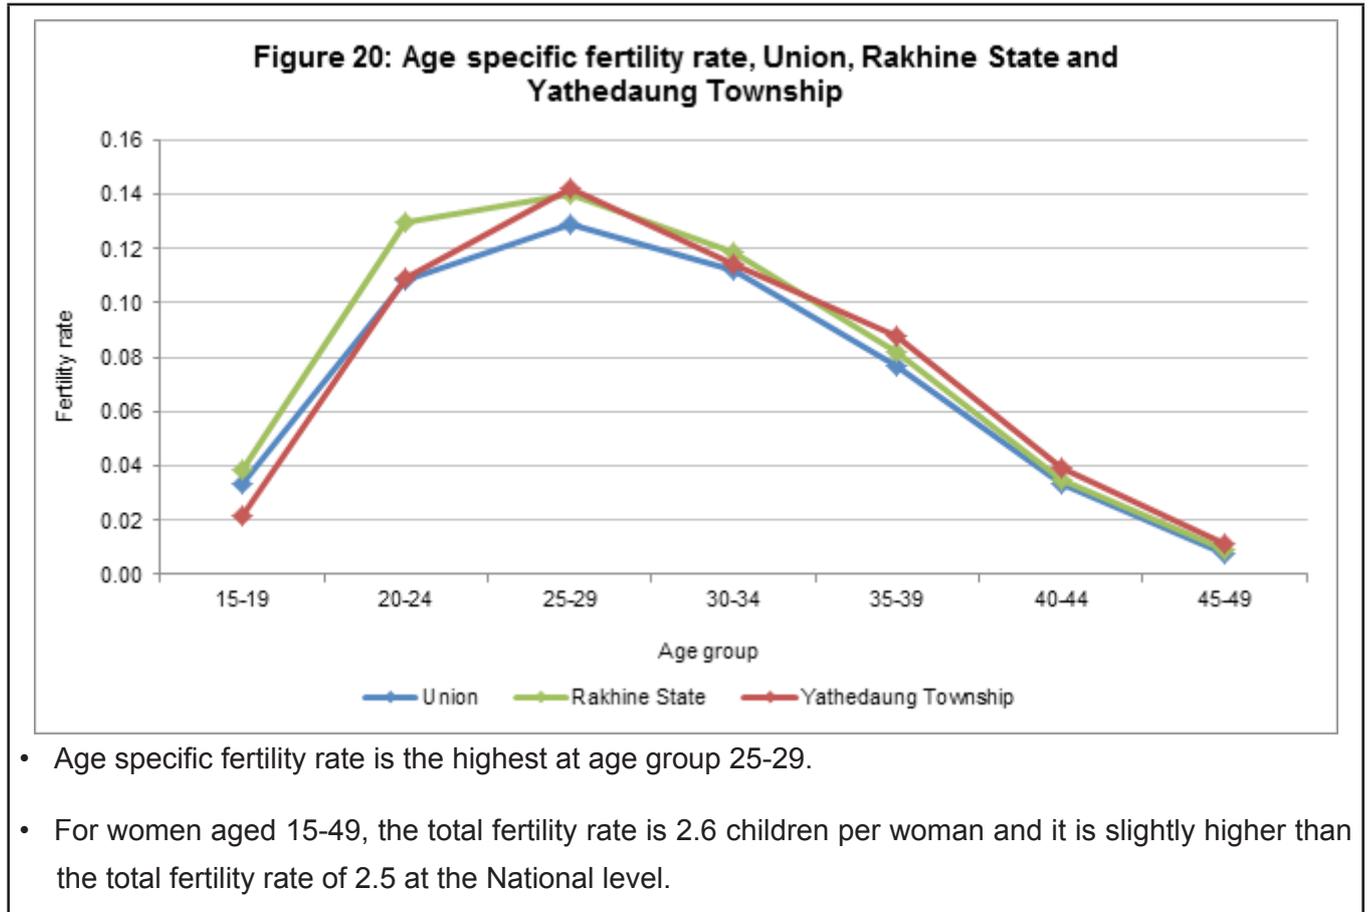

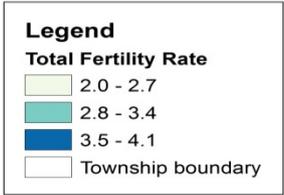

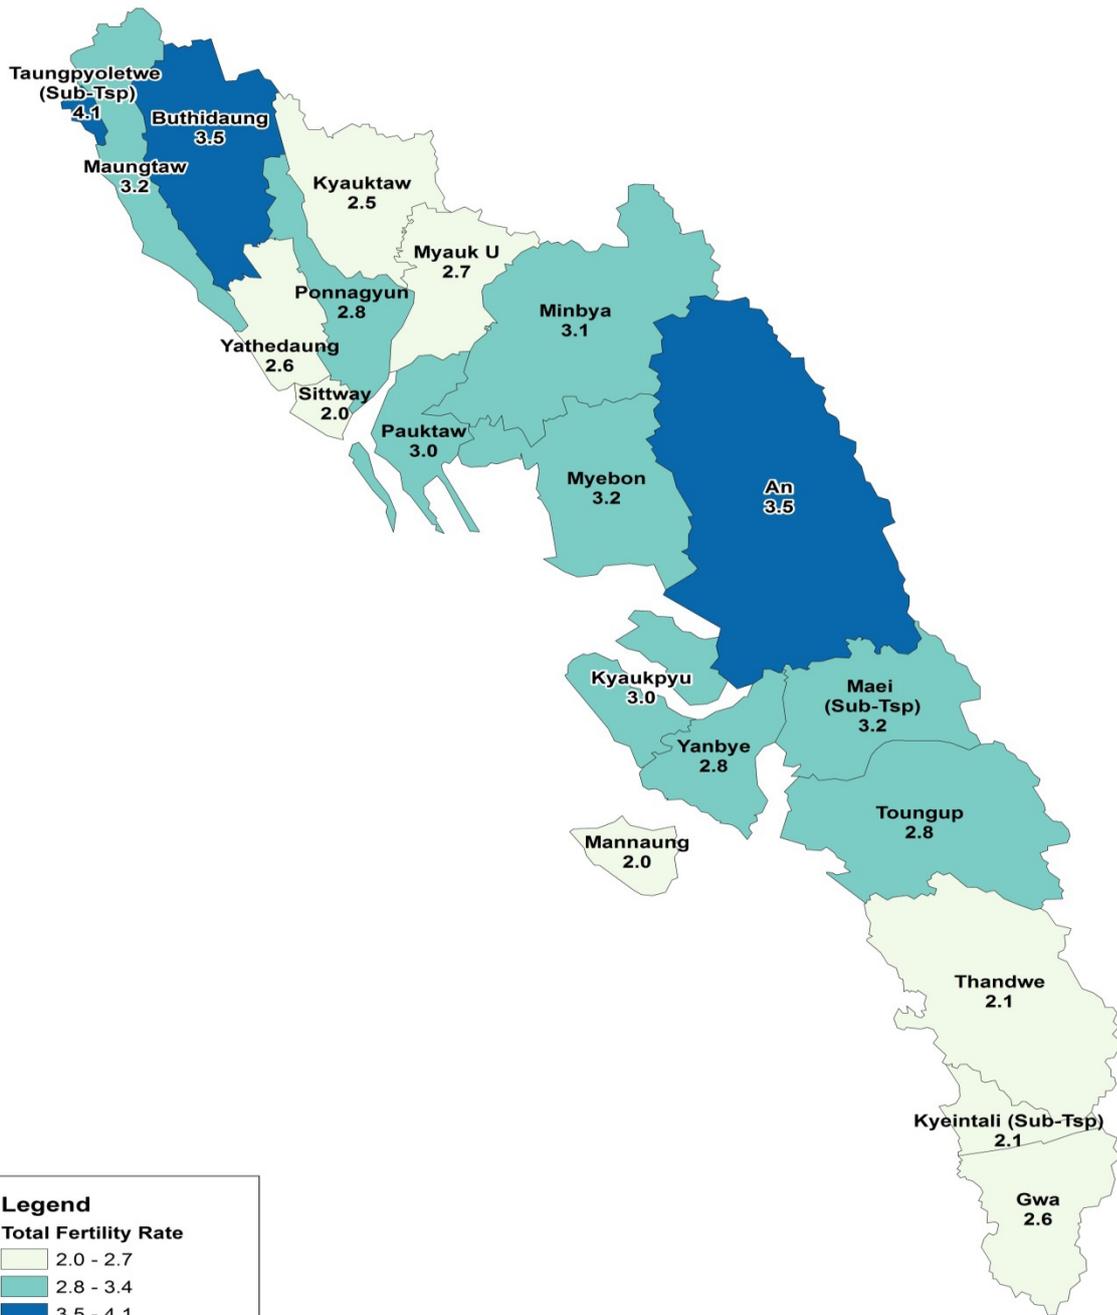

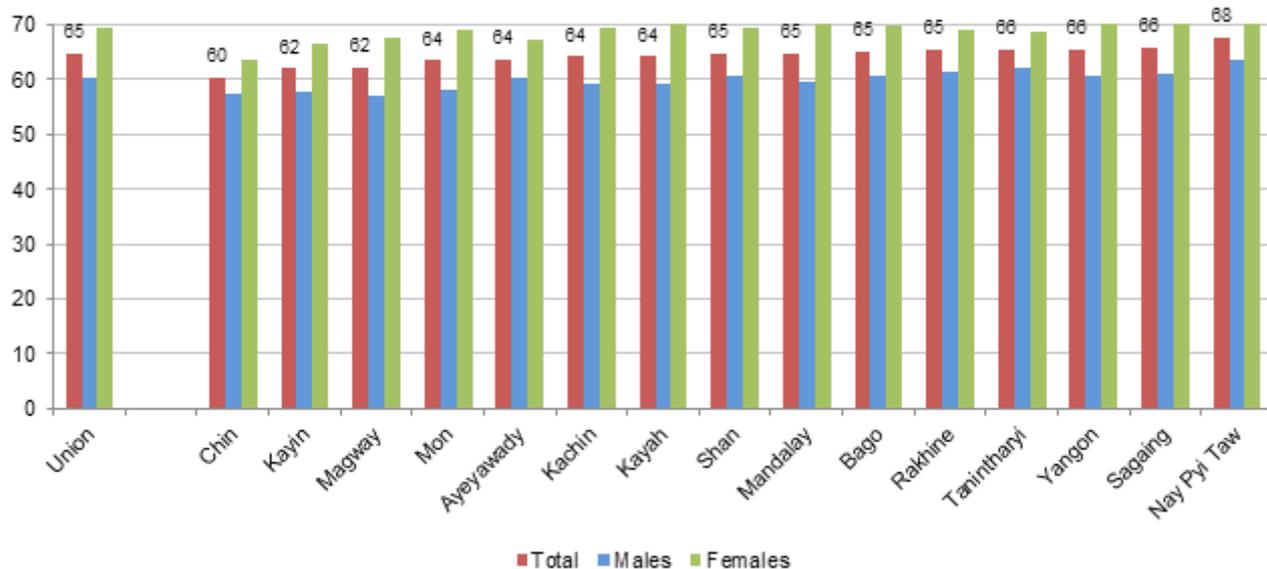

Figure 21: Total fertility rate

Union	: 2.5
Rakhine State	: 2.8
Sittway District	: 2.6
Yathedaung Township	: 2.6

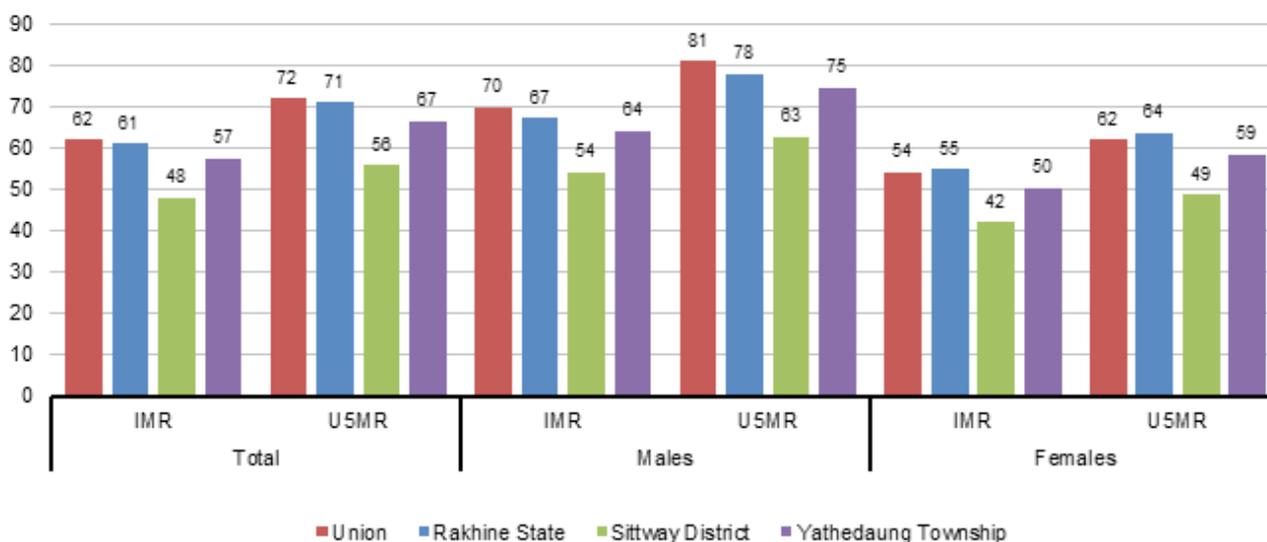

Figure 22: Life expectancy (Union and State/Region)

- The expectation of life at birth in Rakhine State is 65.5 years and is higher than that of National level at 64.7 years.
- The female life expectancy at 69.3 years is higher than that of the males at 61.6 years.

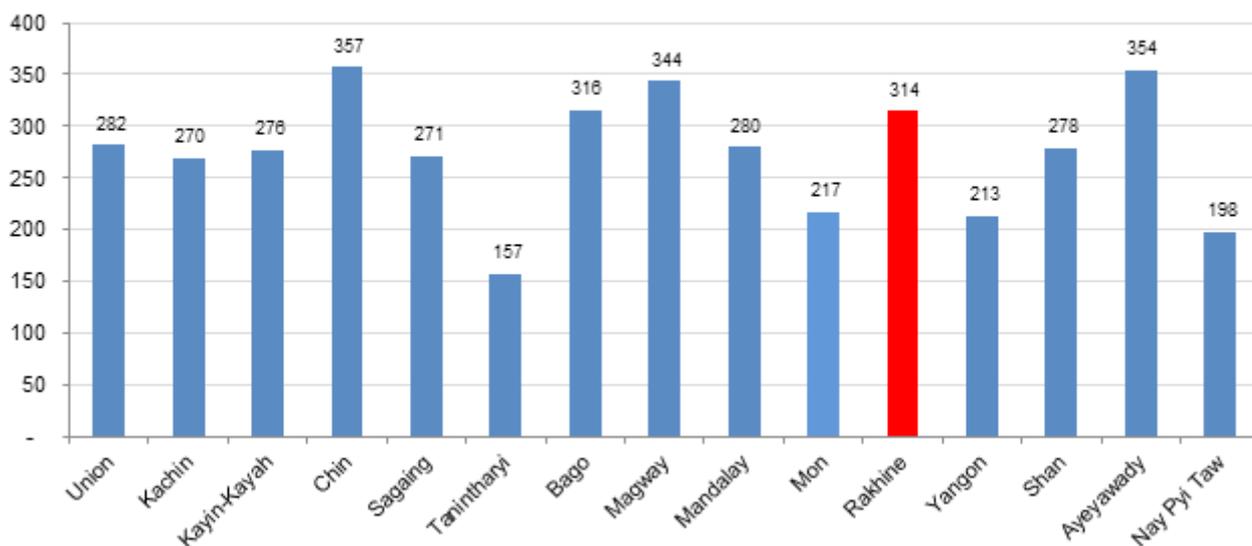

Childhood Mortality and Maternal Mortality

Figure 23: Infant and Under 5 mortality rates

- The Infant and Under 5 mortality rates in Sittway District are lower than the Union average. The Infant mortality in Sittway District is 48 deaths under age one per 1,000 live births while Under 5 mortality is 56 deaths under age 5 per 1,000 live births.
- The Infant and Under 5 mortality rates in Yathedaung Township are lower than those in Rakhine State, but it is higher than Sittway District. The Infant mortality is 57 per 1,000 live births and Under 5 mortality is 67 per 1,000 live births.

Figure 24: Maternal mortality ratios (Union and State/Region)

- In Rakhine State, there are 314 women dying while during pregnancy/delivery or within 42 days of termination of pregnancy for every 100,000 live births.
- The maternal mortality ratio is higher than that of the Union level.
- Compared to the average maternal mortality ratio of 140 for Southeast Asian countries, the maternal mortality ratio of 282 for Myanmar is high.

Definitions and Concepts

Population: The population in this report corresponds to the de-facto population of Myanmar on Census Night (see below).

Census Night: The night between the 29th and the 30th March 2014. Every person in Myanmar was enumerated where they spent the Census Night.

Rural area: Areas classified by the Department of General Administration (GAD) as village tracts. Generally these are areas with low population density and a land use which is predominantly agricultural.

Urban area: Areas classified by the GAD as wards. Generally these areas have an increased density of building structures, population and better infrastructural development.

Population Density: The population density relates to the number of persons in a given administrative area to the surface of the area, expressed in square kilometres (Km²). Areas covered by water are excluded from the calculation.

Mean Household Size: The average number of persons per household (people living in households divided by number of conventional households).

Sex ratio: The number of males for every 100 females in a population.

Dependency ratio: The total dependency ratio is the ratio of dependents (people younger than 15 years and older than 64) to the population of working-age (age 15-64). Data are shown as the proportion of dependents per 100 working-age population. Three different measures can be calculated: total dependency ratio, child dependency ratio and old age dependency ratio.

Child Dependency Ratio: is the proportion of people younger than 15 years to the working age population (15-64).

Old Dependency Ratio: is the proportion of people older than 64 years to the working age population (15-64).

Ageing Index: The number of persons aged 65 years and over per 100 people under the age of 15 years.

Median Age: The age that divides a population into two numerically equal groups; that is, half the people are younger than this age and half are older.

Education: Education is the process by which people learn through instruction and teaching. The 2014 MPHC placed an emphasis on literacy skills, school attendance and educational attainment. The other categorisations used under education were:

(a) **Literacy:** The ability to read and write in any language with reasonable understanding.

(b) **School attendance:** The attendance at any regular educational institution or systematic instruction at any level of education during the last 12 months. This included schooling at pre-primary, primary, middle, high school and tertiary institutions of higher learning. The options were: (a) Currently attending; (b) Attended previously; (c) Never attended.

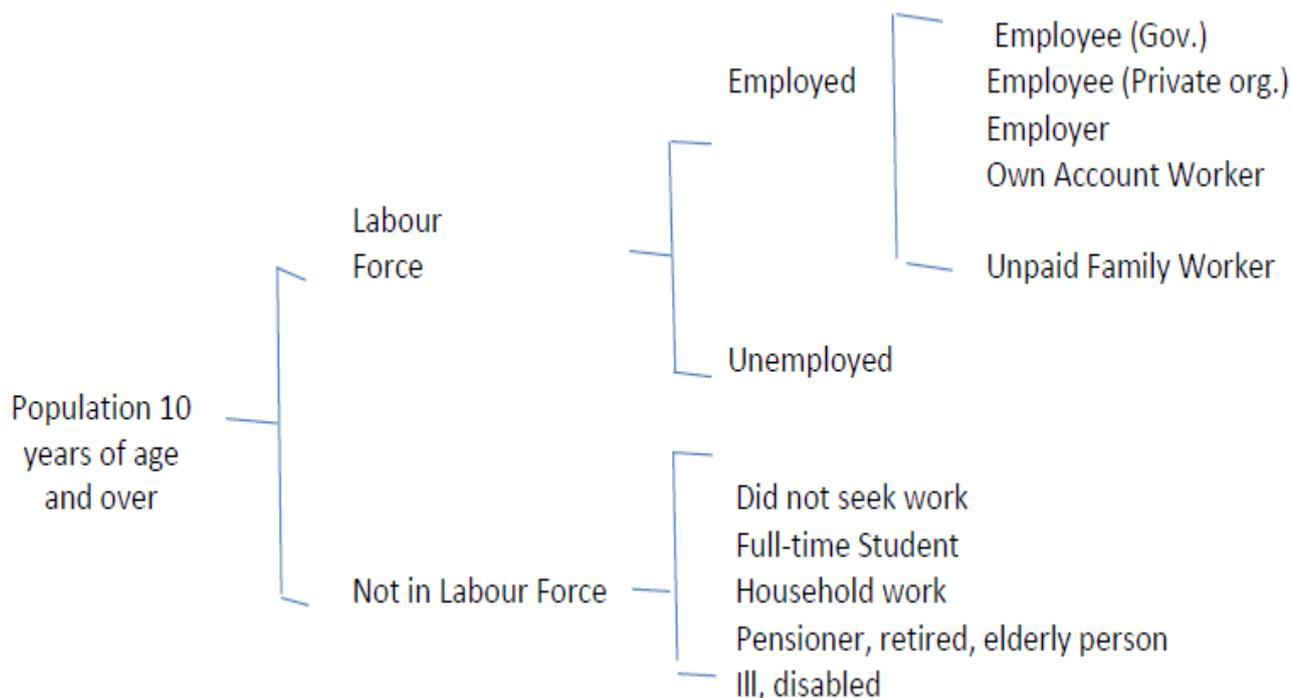

(c) **Educational Attainment:** The highest grade/standard/diploma/degree completed within the most advanced level attended in the education system of the country where the education was received. It covered both public and private institutions accredited by government.

Disability: Disability is a situation where a person is at a greater risk than the general population of experiencing restrictions in performing routine activities (including activities of daily living) or participating in roles (such as work) if no supportive measures are offered. The difficulties covered in the 2014 census included:

- (a) **Walking difficulty** (wheel chairs, crutches, limping, problems climbing steps);
- (b) **Seeing difficulty** (low vision, blind);
- (c) **Hearing difficulty** (partially or completely deaf);
- (d) **Mental/Intellectual difficulty** (slow learning development making it hard to compete with their counterparts at school, other mental conditions).

Identity card: An identity card is a document used to verify aspects of a person's personal identity. There are several types of identity cards issued by the Government of Myanmar, and national passports in the case of foreigners.

Labour Force Status: According to the type of usual economic activities during the 12 months before Census Night, all persons 10 years of age and over were classified as follows:

Labour Force: The Labour force is a general term covering “employed” and “unemployed” persons in the population.

Employed: “Employed” persons refer to those who did any work during the time of the week before the census date or worked for more than 6 months in the 12 months before the census date for pay or profit, such as a wage, salary, allowance, business profit, etc. Also included in this category were persons

working in family businesses, on a farm, in a store, in a private hospital etc., even though they were not paid any wages.

Unemployed: “Unemployed” persons refer to those who had no work but were able to work and actually seeking a job during the reference period, or at the time of the census enumeration.

Not in labour force: This category comprised persons who had no work and did not make any positive efforts to find a job during the 6 months before the census date or were unable to work. This included full time students, household work, elderly people, etc.

Employment Status: All employed persons were classified according to the economic activity status in the place where they worked during the last 12 months or if they worked in more than one place, where they worked most of the time. There were five employment categories:

- (a) **Employee (Government):** those employed and working for government including in state organisation institutions.
- (b) **Employee (Private organisation):** those employed and working for private employers or private organisations. All people in private companies, NGOs, international organisations, retail and wholesale enterprises fell under this category.
- (c) **Employer:** persons who during the reference period worked in their own business, which also employed one or more other persons.
- (d) **Own account worker:** self-employed persons who worked in their own business or worked in their own/family business for family gain **and did not have any employees.**
- (e) **Unpaid family worker:** persons who worked in a business, farm, trade or professional enterprise operated by a member of the household/family and received no pay.

Labour force participation rate: The labour force participation rate is the ratio between the labour force and the overall size of the total population of the same age range. This is an important indicator as it portrays the proportion of the population that is economically active.

$$\text{Labour force participation rate} = \frac{\text{Labour force (Employed + Unemployed)}}{\text{Total Population}} \times 100$$

Unemployment rate: The percentage of the total labour force that is unemployed but actively seeking employment and willing to work. These are people who are without work, looking for jobs and available for work.

$$\text{Unemployment rate} = \frac{\text{Unemployed}}{\text{Labour force (Employed + Unemployed)}} \times 100$$

Employment to population ratio: A statistical ratio that measures the proportion of the country's working-age population (ages 15 to 64) that is employed. The International Labour Organization (ILO) states that a person is considered employed if they have worked at least 1 hour in "gainful" employment in the most recent week.

$$\text{Employment to population ratio} = \frac{\text{Employed}}{\text{Total Population}} \times 100$$

Occupation: Occupation refers to the kind of work an employed person did in the establishment during the 12 months (reference period) before the census date. Put differently, occupation is the kind of work done during the last 12 months by the person employed, regardless of the industry of the establishment. In the 2014 Myanmar Census, field data collectors were instructed to collect a detailed description of the work being done such as accounts clerk, data entry operator (clerk), legal secretary, domestic worker, fisherman, human resource manager, etc. If an employed person was engaged in two or more jobs, the kind of work was decided by the work in which he/she was mainly engaged in, that is in terms of time. The occupational classification is based on the ISCO 2008.

Industry: Industry refers to the main activity of the establishment where an employed person usually worked during the 12 months (reference period) before the census date. In the 2014 Myanmar Census, industry was explained to the enumerators as the type of economic activity carried out at the person's place of work. It is defined in terms of the kind of goods produced or services supplied by the enterprise in which the person works and not necessarily the specific duties or functions of the person's job. For example, a clerical officer working in stores within a factory that makes television sets. The industry should be recorded as manufacture of electrical goods. If an employed person worked in two or more establishments, "industry" was decided by the establishment where he/she worked most. The industrial classification is based on the ISIC Revision 4.

Live Birth: A live birth is one where the infant shows one or more of the following signs of life immediately after birth: crying or similar sounds, movement of the limbs or any other parts of the body and/or any other tangible signs of life. The census was concerned only with children born alive. Also collected was information on the last live birth of ever married female respondents.

Total fertility rate (TFR): The average number of children that a woman would give birth to if all women lived to the end of their childbearing years and bore children according to the current schedule of age-specific fertility rates.

$$\text{Total fertility rate (TFR)} = 5 \sum \text{Age specific fertility rate (ASFR)}$$

Age specific fertility rate (ASFR): The age-specific fertility rate measures the annual number of births to women of a specified age or age group per 1,000 women in that age group. Unless otherwise specified, the reference period for the age-specific fertility rates is the calendar year.
